

PROFILE SUMMARY

Curious and innovation-driven Computer Science Engineering student passionate about software development, open source, and problem-solving. Experienced in building web applications, contributing to technical communities, and continuously strengthening DSA and frontend development skills through projects, coding practice, and hackathons.

FUNCTIONAL AREAS

- Data Structures and Algorithms
- Frontend Development
- Web Development
- Open Source
- Problem Solving

TECHNICAL SKILLS

- Programming - Java, JavaScript, Python, C
- Frontend Development - React.js, HTML, Tailwind CSS
- Backend & Database - Firebase
- DevOps & Tools - Git & GitHub, VS Code, Vercel, Firebase, Canva, Flutter, n8n

EDUCATION

B.E. Computer Science and Engineering, Rajalakshmi Engineering College08/2025 – 05/2029

EXPERIENCE

Elite Coders Summer of Code (ECSoc) - Campus Ambassador07/2026 – Present

Promote ECSoc within the student community through outreach initiatives, encourage participation in open-source programs, organize awareness activities, and strengthen community engagement.

PROJECTS

REC Voice – Anonymous Student Feedback Portal06/2026-07/2026

- Developed an anonymous student feedback portal for Rajalakshmi Engineering College allowing students to submit complaints and suggestions without revealing their identity.
- Implemented a thumbs-up voting system enabling students to support existing complaints based on community interest.
- Introduced priority classification using High, Medium, and Low levels to help administrators identify critical issues.
- Designed a complaint tracking workflow with Pending, Under Review, and Approved statuses for transparent issue resolution.
- Built a clean and responsive user interface focused on improving communication between students and college management.

Debug Diary AI – Intelligent Debugging Journal02/2026-03/2026

- Designed an AI-inspired web application that helps developers document coding mistakes, debugging approaches, and lessons learned.
- Proposed features including debugging history, learning consistency tracking, personalized insights, and nearby hackathon recommendations.
- Focused on building a clean and responsive interface to enhance the developer learning experience.

Personal Portfolio Website12/2025-01/2026

- Designed and deployed a responsive personal portfolio showcasing technical skills, certifications, coding profiles, projects, and achievements.
- Built a modern and user-friendly interface to strengthen personal branding and professional online presence.
- Integrated GitHub, LinkedIn, contact information, and portfolio sections for easy accessibility.

Number Guessing Game10/2026-11/2026

- Developed a console-based number guessing game using C programming.
- Implemented random number generation, user input validation, attempt tracking, and result feedback.
- Strengthened understanding of control structures, loops, functions, and problem-solving concepts in C.

ACHIEVEMENTS

- Maintained a 110+ day coding streak and solved 175+ problems on LeetCode, demonstrating consistency in DSA practice.
- Selected as Campus Ambassador for Elite Coders Summer of Code (ECSoc).
- Secured a 9.6 CGPA in the first year at Rajalakshmi Engineering College.
- District First in Class XII , District Second in Class XI , School third in Class X
- Scored 92 percentile in JEE Main 2025 and qualified for JEE Advanced 2025.
